

Volume incentive scheme on Paris Commodity contracts

LCH.Clearnet SA is pleased to announce the implementation of a volume incentive scheme for all Commodity future and option contracts. This scheme will apply to all members, irrespective of the origin on which they are trading (client activity or own account).

For 2013, the previous fixed clearing fee is replaced by a sliding fee scale incentivising volume growth. The cumulative brackets offer clearing fee decreases for all participants of up to 50%, depending on their monthly volume.

Should you require further information, please do not hesitate to contact your account manager (and visit our website at http://www.lchclearnet.com/fees/sa/products/derivatives_markets.asp where you will find the 2013 fee grid).
